

Exela Technologies Launches Remote Online Notarization, Exela RN

December 7, 2021

IRVING, Texas, Dec. 07, 2021 (GLOBE NEWSWIRE) -- Exela Technologies, Inc. ("Exela") (NASDAQ: XELA) today announced the launch of Exela Remote Notarization ("Exela RN"), the company's proprietary remote notarization platform. [Exela RN](#) is live and in this initial stage is inviting notaries to sign up to its online notary program.

Exela RN is a web portal that facilitates connecting signatories to credentialed notaries in order to schedule and record successful notary sessions within a secure online environment, enabling customers to get a document notarized online using any kind of connected device. Notaries will be provided with an electronic notary journal and recording vault from which they can retrieve their sessions, as well as easy to use scheduling tools, calendars to customize availability, and an account dashboard to track payments and appointments.

While Exela RN works independently from other Exela solutions, the platform also integrates with Exela's e-Signature solution, [DrySign](#), offering a completely new product that aligns with commercial needs in a business environment that is becoming predominantly virtual. Exela RN also integrates with the [Digital Mailroom](#) platform by enabling prospective Digital Mailroom customers to easily notarize the USPS form required for delivering postal mail through an agent. This enables customers to onboard seamlessly and indirectly supports wider adoption of Digital Mailroom.

"We expect that Exela RN will help onboard Digital Mailroom customers faster and also note that as a standalone solution Exela RN will enable individuals and businesses to notarize online. We are pleased that over half of the states in the US now have laws in place to facilitate online notarization and anticipate more states will participate. This secure solution is faster and more convenient than traditional, in-person notarization methods and we are looking forward to welcoming online users as soon as we have onboarded online notaries," noted Suresh Yannamani, President of Exela.
